About me

I am a beginner web developer who is looking forward to new challenges in programming and automation area. Before I developed an interest for coding, I was an experienced IT Service Desk support analyst at *Danske Bank Group IT Lithuania* for over 2 years. In order to re-establish myself as a developer, I have completed intensive programming courses for beginners at Vilnius Coding School and then PHP courses at Code Academy. To better understand IT infrastructure, I have obtained knowledge and certificate of ITIL, in addition, I had an opportunity to cover a Queue Manager role in Application Integration team within Danske Bank for 3 months. To sum up, I have a keen interest in computer science, knowledge about IT infrastructure, great communication skills, I understand the value of good service objectives and I am excited for new opportunities within IT world.
